## Grid systems

### Grid

• Een grid system is een framework waarin je al alle mogelijke elementen kan plaatsen, zonder dat je de consistentie verliest.

### Voordelen:

- Makkelijke uitbreidbaar (modulair)
- Consistent/harmonieus geheel

### canvas

# grid

## columns

### rows

## units

## Aantal columns

- Aantal columns per canvas?
  - Mag je volledig zelf kiezen
  - MAAR:
    - een getal dat deelbaar is door

2 EN 3 OF 4

werkt het beste

#### bv.

- **>> 73 columns**: niet deelbaar door 2, 3 of 4 -> ver van wegblijven!
- **>> 56 columns**: deelbaar door 2, niet door 3 wel door 4 -> ok, maar niet ideaal
- **>> 18 columns**: deelbaar door 2 en 3, maar niet door 4 -> ideaal!
- **>> 24 columns**: deelbaar door 2, 3 én 4 -> superideaal!
- Veelvouden van 12 zijn het meest ideale aantal columns omdat deze deelbaar zijn door 2, 3 én 4

## Aantal columns

- Praktische berekening:
  - Canvas van 600px op 600px
  - 12 columns
  - Breedte van één column:
    - Berekening:
      - Breedte canvas / aantal columns = column breedte
      - -600 / 12 = 50
    - Antwoord: 50px

- De Standaard
  - Vlaamse krant met het beste online design.
  - Gekozen voor 5 column grid omdat dit het beste een echte krant weerspiegelt
    - gedrukte kranten gebruiken meestal oneven columns:
      3, 5, 7 en zelfden 9
      <a href="http://designingfortheweb.co.uk/book/part5/part5">http://designingfortheweb.co.uk/book/part5/part5</a> chapter25.php
  - Heeft hier en daar toch onregelmatigheden
    - Oorzaken?
      - Foutjes gemaakt bij het ontwerpen van het grid
      - Bepaalde situaties niet geanticipeerd door designers
      - Slechte implementatie van de style guide door de klant (= De Standaard)

#### 'Al Qaeda-leider Belmokhtar gedood in Mali'

Het Tsjaadse leger beweert dat ze erin geslaagd zijn Mokhtar Belmokhtar te doden, een Al Qaeda-leider en het brein achter de bloedige gijzeling in Algerije, eerder dit jaar, die aan 37 gijzelaars het leven heeft gekost.

### BBC

- Huisstijl is toonaangevend op gebied van vormgeving
- lets geavanceerdere versie van grid-systeem, maar principes blijven gelden
  - 31 columns zonder gutters.
    - Columns dienen als gutters
    - Biedt maximale flexibiliteit
